Delhi, India

TECHNICAL SKILLS

- **AI Tools & Platforms:** ChatGPT, Claude, GitHub Copilot, OpenAI API
- **Programming Languages:** Python, SQL, Java
- **Backend:** FastAPI
- **AI/ML Technologies:** Machine Learning, Deep Learning, NLP, Large Language Models (LLMs) , RAG
- **Data Analysis & Visualization:** Microsoft Excel, Data Cleaning, Data Analysis
- **Databases & Storage:** Vector Databases (ChromaDB), PostgreSQL, MongoDB, Neo4j, MySQL
- **Frameworks & Libraries:** scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, TensorFlow, Keras
- **Tools & Platforms:** Git, Google Colab, Jupyter, VS Code, Docker

PROFESSIONAL EXPERIENCE

Web Development Intern

Avantyx Solutions

Nov 2025 – Feb 2026

Delhi, India

- Built and deployed the official company website, optimizing UI/UX and responsive performance to drive lead generation and engagement.
- Collaborated with the core team on GTM planning, market positioning, and digital branding during the company's foundational phase.

Data Analytics Intern

Indian Cybercrime Coordination Center (I4C), MHA

Jun 2025 – Aug 2025

New Delhi, India

- Designed and developed interactive dashboards for cybercrime analysis, serving 1,000+ law enforcement officials.
- Built graph-based data models using **Neo4j** to visualize relationships between cases, suspects, and digital evidence.
- Improved data reporting efficiency by 100%, enabling real-time insights for critical decision-making.

EDUCATION

B.Tech – Artificial Intelligence and Data Science

Vivekananda Institute of Professional Studies, GGSIPU

2023 – 2027

CGPA: 8.7/10

Senior Secondary Education – CBSE

Guru Harkrishan Public School, Delhi

2022 – 2023

82%

Secondary Education – CBSE

Victor Public School, Delhi

2020 – 2021

92%

PROJECTS

Clinical Co-Pilot – RAG Healthcare Assistant

- Built end-to-end RAG pipeline using LLMs + **ChromaDB** with semantic retrieval for grounded clinical responses.
- Implemented document chunking, embeddings, and a FastAPI-based backend for high-concurrency inference.

AI Automation & Business Workflows

- Designed and implemented conversational AI agents for Real Estate and Customer Support using n8n and GPT-4o, integrating context aware memory, automated order tracking, and dynamic lead capture through scalable webhook-driven workflows and seamless API.
- Built intelligent automation pipelines for Cold Email Outreach and Inventory Management, leveraging Google Gemini for personalized content generation, rule-based decision logic, and streamlined multi-step operational approval processes across business functions.

Cardiovascular Disease Prediction System

- Developed and compared ensemble machine learning models including Random Forest, SVM, Logistic Regression, Decision Tree, and Neural Networks for early cardiovascular disease prediction using a 1,000-patient clinical dataset with 14 key demographic, clinical.
- Implemented comprehensive preprocessing and model evaluation techniques such as missing value imputation, standardization, and 10-fold Validation, achieving up to 98.5% accuracy with Random Forest validated through precision, recall, F1, and confusion matrix.

ACHIEVEMENTS & CERTIFICATIONS

- **Smart Delhi Ideathon 2025:** 3rd Runner Up among 500+ teams, recognized by Lt. Governor of Delhi.
- **Smart India Hackathon (SIH):** 2nd Runner Up – Internal University Round.
- **HackLLM – IIIT Delhi:** Ranked in Top 10 Teams among 500+ teams.
- **AI for Quality Hackathon:** Secured Top 10 position in Rapid Fire
- **Job Simulations:** Accenture (Data Analytics), BCG X (Gen AI) | Excel Certification (Coursera).
